PROFILE

Flutter Developer with 2+ years of professional experience building and deploying mobile applications in production. Experienced in independently handling Flutter application development, REST APIs, Firebase, state management, modular architecture, and Android native integration.

WORK EXPERIENCE

TrustLink Technologies Pvt. Ltd.

9th September 2024 – Present

Mobile Application Developer

- Led end-to-end development and production deployment of the OctaNet application on the Play Store, after which the product was adopted by 7 international companies within 4 months, with their branding and company identity integrated into the application.
- Served as the **sole app developer**, designing and maintaining a modular codebase that reduced the feature-delivery cycle time by 40% while improving development efficiency and adaptability.
- Collaborated closely with Product and QA teams through regular syncs, structured code reviews, and retrospectives, contributing to a 25% reduction in quality defects and continuous improvement of the development workflow.

EDUCATION

- MSc. I.T.** – 2026 – 74.60%
- BSc. I.T.** – 2024 – 72.68%
- HSC** – 2021 – 77.50%
- SSC** – 2019 – 78.20%

ACHIEVEMENTS

Aavishkar 2023 Selection (17th December 2023)

Secured a place in the final round, with 432 placements out of ~6,000 zonal entries, by crafting and presenting an original research project on Cravecoin, grounded in rigorous data analysis and stakeholder feedback loops.

PROJECTS

Fit&Fuel – Offline-First Application (28th July 2025 – Present)

Built a fully offline fitness application using local storage for workout tracking, calorie calculations, progress analytics, personalized recommendations, and dashboard-based performance monitoring.

Power Gauge – Android Method Channels (21st January 2025 – 25th September 2025)

Developed a real-time battery telemetry monitoring app using Method Channels for native Android integration, delivering live performance metrics and battery health analytics.

Cravecoin – Real-time Crypto Tracking (2nd June 2023 – 10th May 2024)

Built a real-time cryptocurrency tracking application featuring market data integration, portfolio management, crypto analytics, and predictive logic for trend monitoring.

CERTIFICATES

- Udemy – AWS Certified Cloud Practitioner (CLF-C02)
- Udemy – Microsoft Certified: Azure Data Engineer Associate (DP-203)
- Udemy – Android App Development in 34 Hours: MobDevOps+ Android 15
- Udemy – Android Apps Development in Hindi and Build 10 Applications
- Udemy – AI & Python Development Megaclass
- Cisco Networking Academy – JavaScript Essentials 1
- Udemy – Spring Framework for Java Developers
- Infosys – Basics of Python

TECHNICAL SKILLS

- **Languages:** Dart, HTML, CSS
- **Framework:** Flutter
- **State Management:** GetX
- **APIs & Services:** REST APIs, Firebase, FCM, Push Notifications
- **Integrations:** Google Maps, Payment Gateways, Android Method Channels
- **Monitoring:** Firebase Crashlytics
- **Database:** SQLite, Cloud Firestore
- **Tools:** Git, GitHub, Android Studio, VS Code, Postman
- **CI/CD:** GitHub Actions
- **Deployment:** Google Play Store

PUBLISHED PAPERS

- **Cravecoin:** The Crypto Tracker (*8th February 2025*)
Thakur Ramnarayan College of Arts & Commerce
- **Fiberflow:** Real-time NMS for ISPs (*1st June 2025*)
IJIRT
- **Towzer:** Connecting breakdowns to solutions (*7th October 2025*)
MyResearchGo
- **Quantaview:** The Crypto Analyzer (*1st November 2025*)
MyResearchGo
- **Fit&Fuel:** The Fitness Tracker (*27th April 2026*)
S.D.S.M. College, Palghar

JOB SIMULATION

Tata Group – Cybersecurity Analyst Job Simulation – November 2024

Mastercard – Cybersecurity Job Simulation – November 2024

Accenture – Data Analytics and Visualization Job Simulation on Forage – June 2024

TCS – Data Visualization: Empowering Business with Effective Insights Job Simulation on Forage – June 2024

BP – Digital Design & UX Job Simulation on Forage – June 2024

BCG – GenAI Job Simulation on Forage – October 2024
